

## Covid-19 vaccine: Why you should not take it

Graham Lyons M Public Health PhD

1. SARS Cov-2 (the supposed cause of Covid-19) has neither been isolated nor characterised, therefore how can it be genuinely tested for, and how can a vaccine be produced for it?
2. Official “virologists”, “epidemiologists”, “infectious disease experts”, “public health officials” are mostly not genuine scientists, are not to be trusted and are usually corrupted by Gates funding. Moreover, the mainstream media (MSM) are just the propaganda arm of the parasitic globalist bankster cabal behind the coronahoax. They have lied massively to us about this fake pandemic since February 2020.
3. Vaccine developers and purveyors have NO LIABILITY (since a US 1986 Act) for any damage (i.e. death, injury) caused by their vaccines.
4. Covid vaccine trials are manifestly inadequate: the drug companies claim to have developed safe, effective vaccines within 11 months of the supposed outbreak of Covid-19: BULLSHIT! It normally takes 5-10 years to develop a vaccine, and then they still carry risks and usually confer no advantages. For example, smallpox, polio, measles, whooping cough, etc were neither reduced nor eliminated by vaccines, but by other public health measures, e.g. better nutrition, safe drinking water, improved sanitation and housing. As expected, after several months of covax, there are thousands of reports of deaths and other adverse reactions, although minimised by the MSM. For example, Spanish media reported that at the Nuestra Senova del Rosario nursing home, Andalusia 46 residents (of a total of ca 100) died within one month of getting the Pfizer covax. Staff reported a “coronavirus outbreak” soon after the vax was administered.
5. Big pHARMA collectively cannot be trusted to act responsibly, ethically and safely, given their woeful vaccine track record, especially in Africa and India, e.g. Glaxo Smith Kline, WHO, Gates vaccine trials in Africa over decades, that resulted in numerous deaths and injuries, including deliberate sterilisation. Fourteen years of Gates polio vaccine in India left 496,000 children paralysed, and in 2017 Indian health authorities ejected the Gates Foundation from the country. None of the above was reported in the MSM.
6. Vaccines for coronaviruses have never been effective and have always been dangerous. The main issue is *paradoxical immune enhancement* or *pathogenic priming*, when the vaccinated individual is subsequently exposed to any coronavirus, e.g. the common cold, and their immune system over-reacts, which can be fatal. This is what happened to all of the vaccinated ferrets in one trial.
7. The new Gates vaccine contains mRNA, thus the vaccinated individual becomes an instant *genetically modified organism* (GMO). There is no reversal once this occurs...a “detox diet” will not fix you. Do you know about the globalists’ transhuman/Human 2.0/Epsilon agenda? The Covax rollout represents a massive, global human experiment of a new, untried, untrials genetic technology. As such, and especially if coercion/mandates apply, this vaccine program violates The Nuremberg Code.

8. Why bother even making or taking a vaccine against such a benign “disease”? And this assumes that it actually exists, and the “cases” (which are actually false positives to a PCR test never designed to identify actual viruses (see Kary Mullis, its inventor, on Youtube, warning of this)), while “Covid-19 deaths” (which are all due to other, real causes, but fraudulently allocated to this “novel coronavirus”) are real. Even assuming all of that, the infection fatality is around 0.04%. Total all-cause mortality in most countries in 2020 is similar to the mean of the previous three years. This is no pandemic. Any surplus mortality that may appear is due to prolonged severe “lockdowns”.
9. Vaccines often contain unethical material, e.g. foetal tissue, attenuated HIV, along with all manner of other toxic shite, e.g. aluminium, mercury, polyethylene glycol, etc, that can trigger anaphylactic shock and autoimmune conditions, and this one is no exception.
10. It is likely to contain the Gates nano-chip (see the ID2020 website) to track you and enable you to become a New World Order slave. It may also contain “nanobots” which can report on myriad physiological parameters to a central authority. Of course, these will not be issues if you die from the vax in any case.
11. There is a risk of mass sterilisation, part of the Gates depopulation agenda. Sterilisation, mostly of women and girls, was achieved in trials in Africa, noted above. You need to realise that we are dealing with seriously evil, psychopathic organisations and individuals here, who hold the bulk of humanity in contempt and want to get rid of it.
12. If the vaccine is self-evidently wonderful, why the need for coercion, which is just an ill-defined step away from mandating it? For example, Qantas CEO Alan Joyce informing us that we won’t board an international flight without proof of Covid vaccination. This is medical tyranny/fascism at its worst and a blatant violation of The Nuremberg Code.
13. If this supposed virus mutates into new strains so rapidly, what is the point of a vaccine anyway? It will soon be outflanked. Oh, I get it...we’ll have to get a new vaccine to deal with each new strain.

**Conclusion: this whole corona business is the greatest hoax ever perpetrated upon humanity. My very strong advice: DO NOT GET VAXXED!!!**

Update early May 2021: The US vaccine adverse events register (which typically includes less than 10% of actual events (including deaths), includes 157,300 reports, including 3,840 deaths and 16,000 serious injuries (for 14/12/20 to 30/4/21). This is more than was reported for all other vaccines in total in the US for the last 15 years. Mike Adams estimates that ca 250,000 Americans will be killed by this experimental genetic/medical intervention by the end of 2021.
